CARD PAYMENTS

Taking credit card payments over the phone is time consuming. The Payments application allows for callers to make payment card industry (PCI) compliant payments, over the phone, 24/7.

Credit card payments are time consuming and handling card holder details require tight controls to avoid exposing your business to risk. Eliminate that with an automated PCI compliant task. PCI Credit Card Payment will allow your customer to enter their credit card details and payment amount. Then it will process the payment, all over the phone, twenty-four hours a day.

- Take in payments 24/7
- Certified Level 1 PCI Compliant
- Choose from several Payment Gateways or add your own (fee for service)
